

## Version 4 New Feature Categories

With the latest release of M3 Version 4, MARS Company's leading meter testing software solution, will add capability and enhancement in the following categories:

### Data Analysis & Visualization

MARS Company is the water industry leader in meter performance analytics. M3 Version 4 offers a better, faster way to analyze data sets and extract actionable insights. Its enhanced user interface and expanded custom reporting creates an effortless user experience. Easily illustrate results and trends with a variety of visual data representation options, then conveniently share the results across platforms.

### Data Integration

M3 Version 4 introduces heightened data integration and system flexibility. Import and store existing testing data or meter manufacturer standards to streamline the post-test data compilation process. Consolidate and share information with expanded ERP communication. Easily extract historic testing statistics to add depth and information to current reports, or to address legal motions. M3 Version 4 operates as an all-in-one system for centralized data storage, backup, and recovery.

### Test System Water Quality Management

A new addition to M3 Version 4, the Water Quality Analysis Program provides the ability to track and maintain positive water quality within the meter testing system. Manually test and input water quality results into M3 for insight on system health to avoid unnecessary wear.

### Meter Testing Management

In high demand from MARS customers, M3 Version 4 will feature the capability to input and store custom meter testing protocols and procedures. Record and track how often each meter type is tested to improve efficiency and reduce missed targets. Utilize the data collected to identify, analyze and correct imbalances in meter testing schedules.

### Water Loss Audit Reporting

Utilize the superior M3 interface to store and display water loss audit data. Visually analyze water audit reports in unique ways to find trends and compare data like never before. Compatible with the M36 Water Audits and Loss Control Program.
